EDUCATION

Dronacharya College of Engineering

Bachelor of Technology in Computer Science and Information Technology

Gurugram, Haryana

Oct. 2022 – Present

EXPERIENCE

Full-Stack Developer

Jul 2024 - Present

Freelance

Remote

- Delivered end-to-end web solutions for clients using React, Next.js, and Node.js.
- Engineered scalable backend APIs and server-side logic with Express.js and Python (FastAPI).
- Managed the full project lifecycle, from client consultation to final deployment on Vercel and AWS.

Python, Web Development Intern

Jun 2024 - Jul 2024

YBI Foundation

Remote

- Contributed to the development of internal web projects using Python, JavaScript, HTML, and CSS.
- Assisted the engineering team in coding tasks, debugging, and testing, gaining practical experience in a collaborative development workflow.

PROJECTS

Shiply | *Next.js, TypeScript, Bun, Hono, Redis, AWS S3, Clerk*

July, 2025

- * Developed a Vercel-like platform for one-click, Git-based deployment of frontend applications.
- * Engineered a high-performance backend using Bun, Hono, and a Redis queue to manage the build and deployment pipeline.
- * Integrated AWS S3 for distributed static asset hosting and implemented custom domain routing with automated SSL.

SkyVault | *Next.js, TypeScript, Supabase, PostgreSQL, Drizzle ORM, Clerk*

June, 2025

- * Built a secure, full-stack cloud storage application using Next.js 14, Supabase, and PostgreSQL.
- * Utilized Drizzle ORM for type-safe database operations and implemented user-specific storage with secure, expiring URLs.
- * Integrated in-browser file previews for images, videos, and PDFs, alongside a real-time storage analytics dashboard.

Genie | *Next.js, TypeScript, NeonDB, Vercel AI SDK, NextAuth*

May, 2025

- * Developed a responsive AI chatbot integrating multiple LLMs (GPT, Gemini, Llama) via the Vercel AI SDK and OpenRouter.
- * Engineered a scalable backend on a serverless stack (Next.js, NeonDB) with a credit-based usage system to manage API calls.
- * Implemented secure authentication using NextAuth (Google/GitHub OAuth) and enabled real-time, markdown-rendered chat streams.
